

IN THE CLAIMS: /

Cancel claims 1-20 without prejudice or disclaimer and insert new claims 21-47 as follows:

21. (New) A tissue dispenser comprising a body forming a tissue dispenser station for containing tissues to be dispensed, and a tissue disposal station for receiving used tissues; the tissue dispenser station separated by a wall from the tissue disposal station and having a tissue dispensing orifice; the tissue disposal station having a tissue disposing orifice; the body defining a top portion and a bottom portion; the tissue dispensing orifice disposed in the bottom portion and facing downwardly; the dispenser including a fastener for fastening the dispenser above floor level to expose the tissue dispensing orifice.

Q3 22. (New) The tissue dispenser according to claim 21 wherein the tissue disposing orifice is disposed in the top portion of the dispenser.

23. (New) The tissue dispenser according to claim 22 wherein the tissue disposal station overlies the tissue dispenser station.

24. (New) The tissue dispenser according to claim 21 wherein the tissue disposal station overlies the tissue dispenser station.

Sub C17 25. (New) The tissue dispenser according to claim 21 wherein the dispenser includes a back portion, the fastener comprising an adhesive disposed on the back portion.

26. (New) The tissue dispenser according to claim 21 wherein the fastener includes an elongated element for suspending the body.

27. (New) The tissue dispenser according to claim 21 wherein the tissue disposing orifice is covered by a membrane.

28. (New) The tissue dispenser according to claim 21 wherein the body includes a flat support shelf for supporting soap.

29. (New) The tissue dispenser according to claim 21 wherein the tissue dispenser station is enclosed except for the tissue dispensing orifice, and the tissue disposal station is enclosed except for the tissue disposing orifice.

30. (New) The tissue dispenser according to claim 29 wherein the body includes an openable door for accessing at least one of the tissue dispensing station and the tissue disposal station.

31. (New) The tissue dispenser according to claim 21 wherein the tissue dispenser station contains a tissue cartridge.

32. (New) A tissue dispenser comprising a body forming a tissue dispenser station for containing tissues to be dispensed, and a tissue disposal station for receiving used tissues; the tissue dispenser station separated by a wall from the tissue disposal station and having a tissue dispensing orifice; the tissue disposal station having a tissue disposing orifice; the body including a rear portion with an adhesive element disposed thereon for fastening the dispenser above floor level; the tissue dispensing orifice and the tissue disposing orifice being spaced from the rear portion.

33. (New) The tissue dispenser according to claim 32 wherein the tissue dispenser station and the tissue disposal station are oriented one above the other.

34. (New) The tissue dispenser according to claim 33 wherein the tissue disposal station overlies the tissue dispenser station.

35. (New) The tissue dispenser according to claim 34 wherein the body forms a top portion and a bottom portion; the tissue disposing orifice disposed in the top portion, and the tissue dispensing orifice disposed in the bottom portion and facing downwardly.

Sub C27 36. (New) A tissue dispenser comprising a body forming a tissue dispenser station for containing facial tissues to be dispensed, and a tissue disposal station for receiving used tissues; the tissue dispenser station separated by a wall from the tissue disposal station and having a tissue dispensing orifice; the tissue disposal station having a tissue disposing orifice; and an elongated element for suspending the body above floor level.

37. (New) The tissue dispenser according to claim 34 wherein the tissue dispenser station and the tissue disposal station are oriented one above the other.

38. (New) The tissue dispenser according to claim 37 wherein the tissue disposal station overlies the tissue dispenser station.

39. (New) The tissue dispenser according to claim 38 wherein the body forms a top portion and a bottom portion; the tissue disposing orifice disposed in the top portion, and the tissue dispensing orifice disposed in the bottom portion and facing downwardly.

Sub B17
40. (New) A method of providing tissues in a shower stall comprising the steps of:

A) providing a tissue dispenser having a tissue dispenser station containing tissues to be dispensed, and a tissue disposal station for receiving used tissues, the tissue dispenser station spaced from the tissue disposal station by a wall and having a tissue dispensing orifice, the tissue disposal station having a tissue disposing orifice; and

AB
B) mounting the tissue dispenser at the shower stall above floor level.

41. (New) The method according to claim 40 wherein step B comprises mounting the dispenser with the tissue dispensing orifice facing downwardly.

42. (New) The method according to claim 41 wherein step B comprises mounting the dispenser with the tissue disposing orifice facing upwardly.

43. (New) The method according to claim 40 wherein step B comprises mounting the dispenser with the tissue dispensing orifice and the tissue disposing orifice facing in mutually opposite directions.

44. (New) The method according to claim 40 wherein step B comprises mounting the dispenser with the tissue disposal station and the tissue dispenser station disposed one above the other.

45. (New) The method according to claim 44 wherein the tissue disposal station overlies the tissue dispensing station.

Sub C37
(13)
~~46. (New) The method according to claim 40 wherein step B comprises adhering the dispenser to a vertical wall by an adhesive element disposed on a rear portion of the dispenser.~~

47. (New) The method according to claim 40 wherein step B comprises suspending the dispenser from a support by an elongated element.
